

SEED HUNT

- ~ Find two different seed containers that look good enough to eat. (Don't eat them yourself!)
- ~ Find two different seeds that travel at least a meter when you blow on them.
- ~ Find two different seeds with hooks to stick to fur. (Place an old sweater sleeve or sock top over your arm or leg and see what is collected.)
- ~ Find a seed head with more than twenty seeds in it. How will they travel?
- ~ Find a plant whose seeds have already dispersed. How can you tell?
- ~ If there are trees nearby, look for two different tree seeds that are carried by wind, and two that animals might eat.
- ~ Look at some seeds through a hand lens. Are they smooth? Rough? Hairy? Describe one.
